Tanner Scadden

Tampa Bay, FL | tanner@scaddenfamily.com | 385-231-3361 | https://linkedin.com/in/tanner-scadden

Summary

Over 5 years of experience as a software engineer. Thrives when solving technical problems and leading teams, both as a developer team lead and esports team captain. Customer obsessed. Enjoys mentoring and training team members on technology. Specializes in Typescript.

Experience

`Typescript` `Javascript` `Web APIs` `Node` `Bun` `React` `Solidjs` `Express` `Postgres`
`Neo4j` `OpenAI` `Redis` `DynamoDB` `Remix` `Nextjs` `AWS` `GCP` `Azure`

Technical Co-Founder

Ponder.ly *(July 2022 - Present)*

- Plan and developing web applications and AI services, including meeting with customers to understand problems they faced with understanding their ICP and connecting with their customers.
- Organize company operations through Clickup and Hubspot. Focused on the lean startup methodology.
- Leveraging Solidjs, React/Remix, Neo4j, Redis, and Hono to develop applications for B2B and B2B2C customers.
- Working with Perplexity and OpenAI to perform automated tasks and allow users to talk to their data and gain insights about themselves.

Senior Software Engineer

Demiplane *(March 2022 - March 2024)*

- Collaborated with company CTO and management to architect and develop character tool solutions.
- Met with head of characters to understand needs of the team and develop the no-code visual editor, game engine, and custom framework.
- Worked with project director to improve the performance of the framework, and improve typesafety, and accessibility issues.
- Used various tools such as Serverless framework, Dynamodb, Postgres, Hasura, Redis, Nextjs, React, Typescript, GraphQL, and URQL.

Founder

Neddaxs LLC *(June 2020 - October 2023)*

- Executed the vision of more than 15 companies to bring their start-up ideas to fruition through custom software solutions.
- Advised other technical founders in beginning their own successful startups; this included conducted training sessions, rewritting legacy software, and building new marketing websites.
- Increased company profits to millions by making scaling easier and organizing product development based off of the lean startup metholodgy.
- Contributed to several open source projects, including being a core maintainer of prpc and creating a typesafe chained i18n library for Solidjs

React Developer

Toptal *(June 2021 - September 2022)*

Wildrift ADC

Sentinels *(August 2021 - July 2022)*

- Lead the team to a 2nd place finish in the Season 1 North America Championship and a top 16 finish in The 2022 World Tournament.
- Consistently ranked among the top 50 players in the leaderboards.
- Achieved MVP awards multiple times throughout the pro league.
- Frequently consulted during review sessions to notice areas of improvement as well as identify other team's strategies

Lead Engineer

Webaholics *(March 2021 - January 2022)*

- Led a team of 5 engineers to migrate a legacy application to a modern SAAS platform.
- Implemented a modern tech stack consisting of React, Express, and Postgres.
- Facilitated e-commerce drop shipping and integrated seamlessly with multiple sales channels, including Amazon, eBay, WooCommerce, Walmart, and other major marketplaces.
- Oversaw custom integrations with vendor systems to meet the unique needs of our clients.
- Set up continuous deployments with Azure, including staging, A/B testing, and container swapping for instance deployments to production.

Junior Developer to Team Lead

Solo *(June 2019 - December 2020)*

- Oversaw the development of critical features such as Open API, Reports, and CAD.
- Mentored and trained new engineers on the team.
- Migrated the codebase from jQuery/CakePHP to React/Express, and the database from MySQL to Postgres.
- Played a key role in building integrations with Zapier and writing tests for the API. Built tools that significantly reduced the SLA CAD jobs
- Improved the accuracy and productivity of the Solar Proposals and CAD departments through organizing solar jurisdictions and requirements, HTML Canvas, and custom software

Arena of Valor Support - Team Captain

Allegiance *(Febraury 2018 - December 2018)*

- Won the MVP award for Season 1.
- Partnered with Twitch and Tencent to promote the game and esports scene in North America.
- Won multiple championships and qualified for the world championships twice.
- Placed top 8 and top 16 in consecutive years at the world championships.
